

RETIREMENT ANNUITY

Investors looking to save for retirement over the long term, and who are looking to get the most out of tax efficient retirement savings, should consider an investment in the Ashburton Retirement Annuity.

Ashburton Retirement Annuity

The Ashburton Retirement Annuity is a long-term savings vehicle that offers investors a flexible, tax efficient way to save for their retirement.

A retirement annuity encourages retirement saving, either as a primary retirement savings solution, or as a supplement to your employer's pension or provident fund. The fund complies with Regulation 28 of the Pensions Funds Act.

Benefits of a retirement annuity

Tax efficiency

A retirement annuity is a tax efficient savings product. It offers significant tax advantages to investors who are committed to investing their money, either as a lump sum or via monthly contributions, until they reach the minimum retirement age of 55.

Flexibility

Many people recognise the need to save, but struggle in the short term to meet their financial obligations. A retirement annuity offers you the flexibility to slowly increase your contributions over time in order to meet your retirement saving goals.

Regular income

When you retire (usually at the age of 60), you must use at least two-thirds of your retirement annuity proceeds to buy a retirement income product. This will provide you with a regular income during retirement.

Estate planning benefits

You may nominate beneficiaries for estate planning purposes.

Suitable investors

The Ashburton Retirement Annuity typically suits investors who:

- Are looking to save in an efficient way towards their retirement
- Want to supplement their existing retirement savings
- Are working for businesses that do not provide pension or provident funds

The following types of investors can invest in the Ashburton Retirement Annuity:

- Individuals

Ashburton Investor Services Proprietary Limited ("Ashburton") with Registration Number 2011/139123/07 is an authorised administrative financial services provider (FSP Number 44341).

The Ashburton Retirement Annuity Fund, the Ashburton Pension Preservation Fund and the Ashburton Provident Preservation Fund are all administered by Ashburton. The Ashburton Living Annuity and Ashburton Endowment are both underwritten by MMI Group Limited, Registration Number 1904/002186/06, a registered insurer governed by the Long – term Insurance Act (Act No. 52 of 1998).

The underlying investment options of the Ashburton Living Annuity, Ashburton Endowment and Ashburton retirement products may be unit trusts.

This document and any other information supplied is not "advice" as defined and/or contemplated in terms of the Financial Advisory and Intermediary Services Act, 37 of 2002 ("the FAIS Act") and investors are encouraged to obtain their own independent legal, tax, investment or other professional advice prior to investing. Any investment is speculative and involves significant risks and therefore, prior to investing, investors should fully understand the financial product and any risks associated with them.

Collective investment schemes ("CIS") in securities are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. Forward pricing is used and portfolio valuations take place at approximately 15h00 (14h00 for money market funds) each business day (17h00 at month and quarter end). Instructions to redeem or repurchase must reach Ashburton before 14h00. For money market and short term debt portfolios the price of each participatory interest is aimed at a constant value. While a constant price is maintained the investment capital is not guaranteed. The total return to the investor is primarily made up of interest received but may also include any gain or loss made on any particular instrument. In most cases this will merely have the effect of increasing or decreasing the daily yield, but in extreme case, e.g. defaults by underlying issuers, it can have the effect of reducing the capital value of the portfolio.

CIS portfolios are traded at ruling prices and can engage in borrowing and scrip lending. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. A CIS portfolio may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity.

Participatory interests are calculated on a net asset value (NAV) basis, which is the total market value of all assets in the portfolio including any income accruals and less any permissible deductions from the CIS portfolio divided by the number of participatory interests in issue.

All fees quoted exclude VAT except where stated differently. A full detailed schedule of fees, charges and commissions is available from Ashburton on request and incentives may be paid and if so, would be included in the overall costs.
