

CHINDIA EQUITY FUND STERLING SHARE CLASS

Minimum disclosure document (fact sheet) as at 30 September 2017

Investment objectives & strategy

To achieve long-term capital growth through equity or equity related investments predominantly in the stockmarkets of China and India. The Fund focuses on the quality and attractiveness of individual companies rather than the outlook for particular markets. The Fund also invests in companies traded in other markets where a significant proportion of growth in their underlying business is set to derive from China or India.

Investor profile

This Fund offers the potential for higher returns and is suitable for investors with a more aggressive attitude to risk.

Fund activity

- In China, economic data came in shy of expectations due partly to policy tightening and environmental issues.
- We continue to make the distinction between investors on our views for China and how we allocate capital and manage risk. Currently, we remain bullish and are positioned accordingly, with overweight allocations to cyclical sectors.
- Turning to India, October began with the Reserve Bank of India (RBI) announcing to keep interest rates on hold, while continuing to monitor closely the inflation pressures rising in some parts of the economy.
