

GLOBAL LEADERS EQUITY FUND

Minimum disclosure document (fact sheet) as at 31 October 2017

Investment objectives & strategy

The Global Leaders Equity Fund aims to achieve long-term capital growth over the economic cycle by investing in Transferable Securities issued by leading companies listed globally. While the Fund's investments will be denominated in a range of currencies, the Fund will be seeking to maximise total returns on a US dollar basis. The Fund will invest in a focused portfolio of no more than 25 stocks. Please refer to the Prospectus for the full investment strategy.

Investor profile

This Fund is designed for investors wishing to participate in capital markets and may be most appropriate for investors with a long-term investment horizon, as losses may occur due to high market fluctuations.

Fund activity

- October provided the wider equity market with a strong start to the quarter despite rising expectations for upcoming rate hikes in the US and the UK.
- The rally was concentrated on growth-related areas with only technology (7.1%) and materials (3.0%) outperforming significantly while the telecom, staples and healthcare sectors were unable to contribute positive returns for the month.
- Technology is the standout sector year-to-date returning over 40%, more than twice the returns of global equity markets. Regionally, Japan led returns among developed markets during the month after lagging during the first half of the year. India and Asia outperformed in emerging markets while Latin America underperformed.
- The Global Leaders Portfolio continued to return positive performance during October again making new highs during the month which brings returns for the last 12 months rolling to the high double digits. Having said that, performance in October lagged the wider equity market as several holdings in healthcare, staples and industrials were impacted by disappointing news-flow during results season.
