

DOLLAR ASSET MANAGEMENT FUND

Minimum disclosure document (fact sheet) as at 30 June 2018

Investment objectives & strategy

This Fund aims to achieve an increase in value whilst suppressing volatility and risk, through a conservative allocation of assets between, primarily, international equities, fixed interest securities and cash or money market instruments. Exposure to equities is limited to a maximum of 50% and exposure to fixed income securities is limited to a maximum of 70%. Exposure to currencies, other than base currency, after hedging, will not exceed 50%.

Investor profile

This Fund is suitable for an investor looking to achieve long-term growth of capital, accepting a low to moderate degree of risk.

Fund activity

- Fears of fully fledged global trade war, initiated by the USA, pushed nervous markets into negative territory with both global equity and bond indices declining during June.
- Worries about possible impacts on global growth caused some capital flight from regions perceived to be most at risk, especially emerging markets and the Eurozone.
- The US dollar is still considered to be the safe-haven currency with the DXY Index up another 0.5%. The Chinese renminbi weakened dramatically being down 3.3% against the US dollar in the month.
- JP Morgan EMBI spreads widened another 23 bps to 389 bps as the risk-off environment continued to gather steam. The CRB Raw Industrials index fell from its highest levels in the year to its lowest levels in the space of two weeks.
- Given the increasing signs of economic stresses, we cut equity exposure to slightly below benchmark and shifted some fixed income exposure away from Emerging Markets.

Performance & statistics

Annual average compound rate of return: **4.91%**

Source: Morningstar

The investment performance is for illustrative purposes only and is calculated on a bid to bid basis and does not take any initial fees into account. Income is reinvested on the ex-dividend date. Actual performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income. Past performance is not necessarily an indication of future performance.

Disclaimer

Issued by Ashburton (Jersey) Limited which has its registered office at 17 Hilary Street, St Helier, Jersey JE4 8SJ, Channel Islands. Regulated by the Jersey Financial Services Commission. Ashburton Investments is a registered trading name of Ashburton (Jersey) Limited.

This document is for professional financial advisers only and is not intended for distribution to private investors.

This document has been approved for issue in the UK by Ashburton (UK) Limited, which has its registered office at Austin Friars House, 2-6 Austin Friars, London EC2N 2HD. Ashburton (UK) Limited is authorised and regulated by the Financial Conduct Authority (FRN 185971).

The Fund is not authorised in the UK and is therefore considered an unregulated collective investment scheme for the purpose of the Financial Services and Markets Act 2000. The rules and regulations made in the UK for the protection or compensation of investors do not apply.

In South Africa, the Fund is approved for promotion under section 65 of the Collective Investment Schemes Control Act 2002. Collective Investment Schemes (CIS) are generally medium to long-term investments. A schedule of fees, charges and maximum commissions is available on request from the manager. Forward pricing is used and portfolio valuations take place a 10.00am in Jersey, Channel Islands, on each business day. Instructions to redeem or repurchase must reach Ashburton by 4.00pm on the previous Business Day and will be dealt with on the next Dealing Day. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressures. In such circumstances a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed. In the event a potential investor requires material risks disclosures for the foreign securities included in a portfolio, the manager will upon request provide such potential investor with a document outlining: potential constraints on liquidity and repatriation of funds; Macro-economic risk; Political risk; Foreign Exchange risk; Tax risk; Settlement risk; and Potential limitations on the availability of market information.

The Total Expense Ratio (TER) is expressed as an annualised percentage of the charges, levies and fees incurred by the portfolio related to its management, for the period under review against the average NAV of the portfolio over this period. A higher TER does not necessarily imply a poor return, nor does a lower TER imply a good return. The current TER cannot be regarded as an indication of future TERs. A full detailed schedule of fees, charges and commissions is available from Ashburton on request and incentives may be paid and if so, would be included in the overall costs.

The value of investments and the income from them can go down as well as up, is not guaranteed, and you may not recover the amount of your original investment. Past performance should not be seen as an indication of future performance. Where investments involve exposure to a currency other than that in which it is denominated, changes in rates of exchange may cause the value of the investment to go up or down, consequently, investors may receive an amount greater or less than their original investment.
