## Definitions

Total return:	Total return accounts for two categories of return: income and capital appreciation. Income includes interest paid by fixed income investments, distributions or dividends. Capital appreciation represents the change in the market price of an asset.
NAV (net asset value):	This is the total value of assets in the portfolio less any liabilities, divided by the number of shares outstanding.
TER (total expense ratio):	This is a measure of the total costs associated with managing and operating an investment fund. These costs consist primarily of management fees and additional expenses such as trustee and custody fees, auditor fees and other operational expenses. The total cost of the fund is divided by the fund's total assets to arrive at a percentage, which represents the TER.
Index:	In the case of financial markets, an index is a theoretical portfolio of assets representing a particular market or a portion of it. Each index has its own calculation methodology and is usually expressed in terms of a change from a base value. Thus, the percentage change is more important than the actual numeric value.
Transaction costs:	Total costs incurred by the investor in buying and selling the underlying assets of a financial product and is expressed as a percentage of the daily NAV calculated on an annualised basis. These costs include brokerage, VAT, and trading costs.
Annualised cost:	Is the cost per year of investing in the assets of a financial product.
Annualised return:	This is the average rate earned by the investment over a year in the period measured.
Tracking error:	A measure of the amount of risk that is being taken in excess of the benchmark.

## Disclaimer

Ashburton Management Company (RF) (Proprietary) Limited (Reg No 1996/002547/07) ("Ashburton") is an approved collective investment schemes manager of the Ashburton Collective Investment Scheme ("Ashburton CIS"). Ashburton is regulated by the Financial Sector Conduct Authority (FSCA) and is a full member of the Association for Savings and Investment SA (ASISA). This document and any other information supplied in connection with the Ashburton CIS is not "advice" as defined and/or contemplated in terms of the Financial Advisory and Intermediary Services Act, 37 of 2002 ("the FAIS Act") and investors are encouraged to obtain their own independent advice prior to buying participatory interests in CIS portfolios issued under the Ashburton CIS. Any investment is speculative and involves significant risks and therefore, prior to investing, investors should fully understand the portfolios and any risks associated with them. Collective investment schemes in securities are generally medium to long term investments. In the event a potential investor requires material risks disclosures for the foreign securities included in a portfolio, the manager will upon request provide such potential investor with a document outlining: potential constraints on liquidity & repatriation of funds; Macroeconomics risk; Political risk; Foreign Exchange risk; Tax risk; Settlement risk; and Potential limitations on the availability of market information. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. Forward pricing is used and portfolio valuations take place at approximately 17h00 each business day. Instructions to redeem or repurchase must reach Ashburton before 14h00 to ensure same day value. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressures. In such circumstances, a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed. CIS portfolios are traded at ruling prices and can engage in borrowing and scrip lending. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. A CIS portfolio may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Participatory interests are calculated on a net asset value (NAV) basis, which is the total market value of all assets in the portfolio including any income accruals and less any permissible deductions from the CIS portfolio divided by the number of participatory interests in issue. All fees quoted exclude VAT except where stated differently. The Total Expense Ratio (TER) is expressed as an annualised percentage of the charges, levies and fees incurred by the portfolio related to its management, for the period under review against the average NAV of the portfolio over this period. A higher TER does not necessarily imply a poor return, nor does a lower TER imply a good return. The current TER cannot be regarded as an indication of future TERs. A full detailed schedule of fees, charges and commissions is available from Ashburton on request and incentives may be paid and if so, would be included in the overall costs. The manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The manager has a right to close the portfolio to new investors in order to manage the portfolio more efficiently in accordance with its mandate. Additional information about this product, including brochures, application forms and annual or quarterly reports, can be obtained from the Manager, free of charge, and from the website: [www.ashburtoninvestments.com](http://www.ashburtoninvestments.com). Exchange Traded Funds (ETFs) are Collective Investment Schemes in Securities (CIS) that trade on stock exchanges. Trading in ETFs will incur the normal costs associated with listed securities, including brokerage, settlement costs, Uncertified Securities Tax (UST), other statutory costs and administrative costs. The price at which ETFs trade on an Exchange may differ from the Net Asset Value price published at the close of the trading day, because of intra-day price movements in the value of the constituent basket of securities. Ashburton Fund Managers (Pty) Ltd is an authorised Financial Services Provider.
