

ASHBURTON GLOBAL STRATEGY FUND (USD) - A CLASS

Minimum disclosure document (fund fact sheet) as at 31 March 2019

Investor profile

This is designed as a higher risk strategy for clients seeking to generate additional capital and willing to risk loss of capital.

Investment objectives and strategy

The investment objective of the Ashburton Global Strategy Fund ("the Global Strategy Fund") is to produce long-term capital growth through a portfolio of funds providing exposure to an allocation between global equity, fixed income and cash markets complemented by alternative investment strategies. Using, inter alia, exchange traded funds to provide cost effective and efficient exposure to global equity markets, this portfolio combines specialist multi-manager and single manager solutions to provide access to some of the world's best investment managers.

Performance and statistics

Source: Morningstar®, Ashburton Investments

The investment performance is for illustrative purposes only and is calculated on a bid to bid basis and does not take any initial fees into account. Income is reinvested on the ex-dividend date. Actual performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income. Past performance is not necessarily an indication of future performance. The benchmark is a blend of G7 CPI+4% (2 month lag) from launch of the Fund to June 2017 and the Global Strategy Composite, comprising of 55% MSCI ACWI, 10% Barclays global aggregate, 15% FTSE EPRA/NAREIT developed and 20% HFRI Fund thereon.

Definitions

Total return:	Total return accounts for two categories of return: income and capital appreciation. Income includes interest paid by fixed income investments, distributions or dividends. Capital appreciation represents the change in the market price of an asset.
NAV (net asset value):	This is the total value of assets in the portfolio less any liabilities, divided by the number of shares outstanding.
TER (total expense ratio):	This is a measure of the total costs associated with managing and operating an investment fund. These costs consist primarily of management fees and additional expenses such as trustee and custody fees, auditor fees and other operational expenses. The total cost of the fund is divided by the fund's total assets to arrive at a percentage, which represents the TER.
Index:	In the case of financial markets, an index is a theoretical portfolio of assets representing a particular market or a portion of it. Each index has its own calculation methodology and is usually expressed in terms of a change from a base value. Thus, the percentage change is more important than the actual numeric value.
Transaction costs:	Total costs incurred by the investor in buying and selling the underlying assets of a financial product and is expressed as a percentage of the daily NAV calculated on an annualised basis. These costs include brokerage, VAT, and trading costs.
Annualised cost:	Is the cost per year of investing in the assets of a financial product.
Annualised return:	This is the average rate earned by the investment over a year in the period measured.
Tracking error:	A measure of the amount of risk that is being taken in excess of the benchmark.

Disclaimer

For professional investors and advisers only
Issued by Ashburton (Jersey) Limited. Registered office at IFC1, The Esplanade, St Helier, Jersey JE4 8SJ, Channel Islands. Regulated by the Jersey Financial Services Commission. Ashburton Fund Managers (Pty) Limited has been appointed as Investment Adviser to the Manager for the purpose of providing asset allocation, security selection and fund selection recommendations. It is an approved collective investment schemes manager regulated by the Financial Services Board and a full member of the Association of Saving and Investments South Africa. This document is for information purposes only and should not be construed as an investment advertisement or providing investment advice in whatsoever form. Transaction costs shown on this factsheet are as per audited annual financial reports. Transaction costs include identifiable costs only for purchase and sales transactions such as brokerage charges, commissions, transaction related taxes, custodian transaction fees and other market charges. Investors should note that this Fund has not been registered or authorised by the Financial Services Board of South Africa and therefore may not be promoted in South Africa. Investment in the Ashburton Global Investments Funds Limited may be made by way of a written instruction by the investor to Ashburton Investments or FNB Wealth to invest on its behalf or by Ashburton Investments or FNB Wealth (through Ashburton Fund Managers (Pty) Limited as portfolio/investment manager) investing in terms of a discretionary investment management agreement either holds with a client. The funds contained in the Ashburton Global Strategy Fund and the fund allocations are indicative and are subject to change at the Manager's discretion. The allocations and top holdings reflected are as at the last trading date of the previous month. The Fund is not authorised in the UK and is therefore considered an unregulated collective investment scheme for the purpose of the Financial Services and Markets Act 2000. This document is approved for issue in the UK by Ashburton (UK) Limited, which has its registered office at Austin Friars House, 2-6 Austin Friars, London EC2N 2HD. Ashburton (UK) Limited is authorised and regulated by the Financial Conduct Authority (FRN 185971). If you undertake business with any non-UK authorised firm you will be excluded from the benefit of the rules and regulations made under the UK's Financial Services and Markets Act 2000, including the UK Financial Services Compensation Scheme. Performance is calculated on a bid price to bid price basis with the income reinvested and the effects of initial charges ignored. The value of investments and the income from them can go down as well as up, is not guaranteed and you may not recover the amount originally invested. Past performance should not be seen as an indication of future performance. Where investments involve exposure to a currency other than that in which the Fund is denominated, changes in rates of exchange may cause the value of the investment to go up or down, consequently investors may receive an amount greater or less than their original investment. This is a multi-manager portfolio and should be seen as a medium to long-term investment. Performance is calculated on a bid price to bid price basis with the income reinvested and the effects of initial charges ignored. While all reasonable care has been taken to ensure the accuracy of the contents hereof, no liability or responsibility is accepted for errors it may contain or losses incurred as a result of acting on the contents of this document.
