### Who Should Invest?

The Pointbreak Money Market Fund is suitable for investors seeking a low risk investment that maximises income. It offers a high income yield, capital stability and good liquidity.

### Investment Objective

The fund's objective is to achieve an investment return in excess of general money market instruments and funds, while ensuring a high degree of liquidity, capital preservation and below average risk. The fund invests with the four major banking groups in Namibia, the five major banking groups in South Africa, Nampost Namibia and the Namibian,- and South African Reserve Bank. Securities to be included in the portfolio consist of money market instruments, participatory interests in unit trust schemes, bank call and fixed deposits, fixed income securities, government bills and bonds, quality commercial paper and repurchase agreements.

Average naca Return after fees (2026)	6.63%											
Cents per Unit (2026)	0.5467											

Collective Investment Schemes in Securities (Unit Trusts) are generally medium to long term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Unit Trust prices are calculated on a net asset value basis, which is the total capital value invested including any income accrual and less any permissible deductions from the portfolio divided by the number of units in issue. Income accruals are made daily and paid out monthly. Purchase and repurchase requests may be received by the manager by 10h00 each business day. Permissible deductions may include management fees, brokerage, NAMFISA levies, auditor's fees, bank charges, trustee fees and RSC levies. A schedule of fees and charges is available on request from Ashburton Unit Trust Management Company. Commission and incentives may be paid and if so, would be included in the overall costs.

### Fund Commentary

January 2026 will be remembered by investors around the globe as a highly volatile month. US president Trump's foreign policy has resulted in further sell-off of the greenback (down 1.8%) and continued support of Emerging Market assets and a rush to safe-haven precious metals. This trend has seen a sharp reversal in the last trading session of the month as Kevin Warsh was announced to be taking over from current Fed Chair Jerome Powell in May 2026.

Local annual headline inflation prints reduced slowed from 3.4% to 3.2% in Namibia and increased from 3.5% to 3.6% in South Africa. South African money market rates strengthened with the 12-month NCD tenor down by approximately 10bps, to below 7.0%, on the back of foreign inflows and lower expected inflation going forward. Namibian money market and Treasury-Bills traded unchanged.

The fund maintains its constant duration approach and we expect the portfolio to outperform throughout the cutting cycle.
