# ASHBURTON BOND FUND

Minimum disclosure document (fund fact sheet) as at 31 December 2019

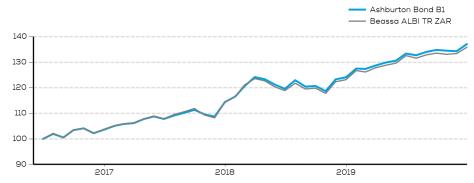

### Investor profile

This fund is suited to investors who are seeking managed exposure to the South African Bond market and who want to take advantage of active management within the fixed interest universe. This fund has a higher risk of capital loss than a money market fund or cash investment, and the investor must ideally look at a term of longer than 3 years. The fund represents our best investment view in the South African Bond space and utilises a range of techniques including active duration management and credit exposure to maximise returns

# Investment objectives and strategy

The investment objective of the portfolio is to provide investors with a well-diversified exposure to the South African bond market. The portfolio will provide a high level of income and seek to enhance investment returns by the active management of interest rate, credit and duration risk. This portfolio seeks to outperform the ALBI over a rolling 36month period. The fund will invest in high-yielding, interest bearing securities including public, parastatal, municipal and corporate bonds, inflation linked bonds, loan stock, debentures, fixed deposits and money market instruments. The portfolio will have flexibility to invest across the duration, credit and yield spectrum. Risks include political, economic, interest rate risk, default risk, as well as general market risk which could lead to an increase in bond yields and credit risk.

# Performance and statistics

Source: Morningstar®, Ashburton Investments

All performance numbers are net of all fees and expenses. The above is purely for illustrative purposes. The above portfolio is calculated on a NAV to NAV basis and does not take any initial fees into account. For reinvesting funds, income is reinvested on reinvestment date. Actual investment performance will differe based on the initial fees applicable, the actual investment date, the date of reinvestment of income and dividend withholding tax. Past perforamnce is not necssarily an indication of future performance.

### **Definitions**

	Total return accounts for two categories of return: income and capital appreciation. Income includes interest paid by fixed income investments, distributions or
Total return:	distributed One that are an electrical and are the second of the second of an area.

dividends. Capital appreciation represents the change in the market price of an asset.

NAV (net asset value): This is the total value of assets in the portfolio less any liabilities, divided by the number of shares outstanding.

This is a measure of the total costs associated with managing and operating an investment fund. These costs consist primarily of management fees and additional TER (total expense ratio): expenses such as trustee and custody fees, auditor fees and other operational expenses. The total cost of the fund is divided by the fund 's total assets to arrive at a

percentage, which represents the TER.

In the case of financial markets, an index is a theoretical portfolio of assets representing a particular market or a portion of it. Each index has its own calculation methodology and is usually expressed in terms of a change from a base value. Thus, the percentage change is more important than the actual numeric value.

methodology and is usually expressed in terms of a change from a base value. Thus, the percentage change is more important than the actual numeric value.

Total costs incurred by the investor in buying and selling the underlying assets of a financial product and is expressed as a percentage of the daily NAV calculated on an

annualised basis. These costs include brokerage, VAT, and trading costs.

Annualised return: This is the average rate earned by the investment over a year in the period measured.

Is the cost per year of investing in the assets of a financial product.

Tracking error: A measure of the amount of risk that is being taken in excess of the benchmark.

# Disclaimer

Annualised cost:

Ashburton Management Company (RF) (Proprietary) Limited (Reg No 1996/002547/07) ("Ashburton") is an approved collective investment schemes manager of the Ashburton Collective Investment Scheme ("Ashburton CIS"). Ashburton is regulated by the Financial Services Board and is a full member of the Association for Savings and Investment SA (ASISA). This document and any other information supplied in connection with the Ashburton CIS is not "advice" as defined and/or contemplated in terms of the Financial Advisory and Intermediary Services Act, 37 of 2002 ("the FAIS Act") and investors are encouraged to obtain their own independent advice prior to buying participatory interests in CIS portfolios issued under the Ashburton CIS. Any investment is speculative and involves significant risks and therefore, prior to investing, investors should fully understand the portfolios and any risks associated with them. Collective investment schemes in securities are generally medium to long term investments. In the event a potential investor requires material risks disclosures for the foreign securities included in a portfolio, the manager will upon request provide such potential investor with a document outlining: potential of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. Forward pricing is used and portfolio valuations take place at approximately 15h00 each business day (17h00 at month and quarter end). Instructions to redeem or repurchase must reach Ashburton before 14h00 to ensure same day value. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressures. In such circumstances, a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed. CIS portfolios are traded at ruling prices and can engage in borrowing and scrip lending. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. A CIS portfolio may borrow up to 10% of the market value of

Bond and Income portfolios derives its income from interest bearing instruments and the yield is historic/current calculated as at 31 December 2019
