

ASHBURTON CREDIT CO-INVESTMENT FUND HIGH QUALITY

Fund fact sheet as at 30 November 2020

Investor profile

The fund is suited to investors who are:

- Looking for returns in excess of cash and money market funds over a long-term horizon (c. 36 months), while at the same time require a degree of capital stability, with limited requirements for daily liquidity.
- Seeking managed exposure to income generating investments with limited duration risk.
- Wanting to take advantage of loans originated by one of the leading investment banks in the country (RMB) across a broader range of issuers than available in the listed bond market.

Investment objectives

The objective of the Ashburton Investment Grade Credit Co-Investment Fund is to achieve stable returns over 3-month JIBAR in excess of 160 basis points, gross of all fees and expenses. The fund aims to achieve its return target by investing in a diversified portfolio of debt instruments, predominantly in the form of bank loans to South African corporates which pay a floating rate linked to JIBAR plus a margin thus limiting volatility with respect to changes in interest rates.

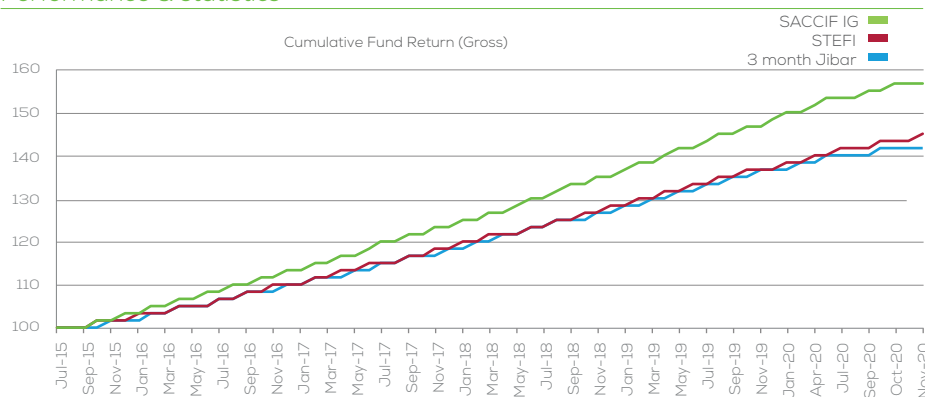

Investment strategy

The loans included in the fund will be obtained through a co-investment arrangement with Rand Merchant Bank, a division of FirstRand Bank Limited ("RMB"). This co-investment arrangement provides the Fund with the right but not the obligation, to invest in all assets originated by RMB which satisfy pre-existing criteria.

The co-investment arrangement allows for the fund to invest alongside RMB on substantially similar economic terms with regards to the Interest Rate received and any underlying security. Additionally, the co-investment arrangement provides the fund with the right, but not the obligation, to co-sell with RMB on a proportional basis and on the same economic terms should RMB decide to sell any of the co-invested assets for credit-related or portfolio management reasons.

Finally, the co-investment arrangement requires RMB to remain invested in any loan acquired by the fund up to at least the exposure of the fund over the entire tenor of the loan.
