## ASHBURTON MULTI MANAGER INCOME FUND

Minimum disclosure document (fund fact sheet) as at 30 November 2019

# ASH3URTON

## Investor profile

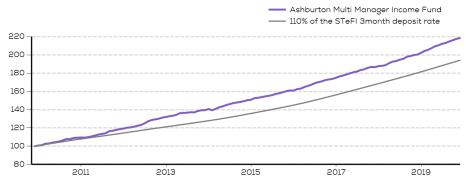

This fund is suited to investors:

seeking a regular and growing income stream from their capital, with a low tolerance for capital volatility; seeking exposure to actively managed high income generating assets; seeking a fund that is managed by a combination of leading South African asset managers in income generating asset classes on a segregated managed basis, and seeking a fund with an investment term of 12 months or longer

## Investment objectives and strategy

This portfolio is diversified across various asset classes. It provides the investor with greater cash and fixed income exposure compared to other asset classes. The fund's exposure to fixed income investments creates sensitivity to changes in bond yields. risin interest rates and inflation uncertainty, as well as exposure to economic, political and credit risk. For credit and income instruments, while unlikely, capital loss may occur due to an event like an issuer's default. The portfolio typically displays higher volatility and lower liquidity than a money market portfolio. This fund has exposure to foreign investment funds and is susceptible to currency risk and potential macroeconomic and political risks brought about by funds invested across various regions. Investments in equity and property are volatile and are susceptible to changes in general market conditions, as well as economic, political and company specific risks.

## Performance and statistics

Source: Morningstar®, Ashburton Investments

All performance numbers are for the B1 share class (capped) and are net of all fees and expenses. The above is purely for illustrative purposes. The above portfolio performance is calculated on a NAV to NAV basis and does not take any initial fees into account. For reinvesting funds, income is reinvested on reinvestment date. Actual investment performance will differ based on the initial fees applicable, the actual investment date, the date of reinvestment of income and dividend withholding tax. Past performance is not necessarily an indication of future performance. Risk benchmark applied for fund statistics: BEASSA 1-3 yr TR ZAR.

Growth (%)	Fund	Benchmark	Fund statistics	Fund	Benchmark

### **Definitions**

Total return:	Total return accounts for two categories of return: income and capital appreciation. Income includes interest paid by fixed income investments, distributions or
	dividends. Capital appreciation represents the change in the market price of an asset.

NAV (net asset value): This is the total value of assets in the portfolio less any liabilities, divided by the number of shares outstanding.

This is a measure of the total costs associated with managing and operating an investment fund. These costs consist primarily of management fees and additional TER (total expense ratio): expenses such as trustee and custody fees, auditor fees and other operational expenses. The total cost of the fund is divided by the fund 's total assets to arrive at a

percentage, which represents the TER.

In the case of financial markets, an index is a theoretical portfolio of assets representing a particular market or a portion of it. Each index has its own calculation methodology and is usually expressed in terms of a change from a base value. Thus, the percentage change is more important than the actual numeric value.

Transaction costs:

Total costs incurred by the investor in buying and selling the underlying assets of a financial product and is expressed as a percentage of the daily NAV calculated on an

annualised basis. These costs include brokerage, VAT, and trading costs.

Annualised cost: Is the cost per year of investing in the assets of a financial product.

Annualised return: This is the average rate earned by the investment over a year in the period measured.

Tracking error: A measure of the amount of risk that is being taken in excess of the benchmark.

## Disclaimer

Ashburton Management Company (RF) (Proprietary) Limited (Reg No 1996/002547/07) ("Ashburton") is an approved collective investment schemes manager of the Ashburton Collective Investment Scheme ("Ashburton CIS"). Ashburton is regulated by the Financial Services Board and is a full member of the Association for Savings and Investment SA (ASISA). This document and any other information supplied in connection with the Ashburton CIS is not "advice" as defined and/or contemplated in terms of the Financial Advisory and Intermediary Services Act, 37 of 2002 ("the FAIS Act") and investors are encouraged to obtain their own independent advice prior to buying participatory interests in CIS portfolios issued under the Ashburton CIS. Any investment is speculative and involves significant risks and therefore, prior to investing, investors should fully understand the portfolios and any risks associated with them. Collective investment schemes in securities are generally medium to long term investments. In the event a potential investor requires material risks disclosures for the foreign securities included in a portfolio, the manager will upon request provide such potential investor with a document outlining: potential constraints on liquidity & repatriation of funds; Macroeconomics risk; Political risk; Foreign Exchange risk; Tax risk; Settlement risk; and Potential limitations on the availability of market information. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. Forward pricing is used and portfolio valuations take place at approximately 15h00 each business day (17h00 at month and quarter end). Instructions to redeem or repurchase must reach Ashburton before 14h00 to ensure same day value. Excessive withdrawals from the portfolio under liquidity pressures. In such circumstances, a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed. CIS portfolios are traded at ruling prices and can engage in borro
