Ashburton Global Flexible Feeder Fund

Minimum Disclosure Document as at 31 August 2025

The MDD covers the purposes of providing a general investor report.

Investor profile

The Fund is suitable for investors that are seeking long-term capital growth through a diversified, multi-asset mandate and who want to obtain global exposure while investing in South African Rands.

Investment objectives and strategy

The objective of the Fund is to achieve capital growth, maximising risk-adjusted returns over the long term while preserving capital. To achieve the objective, the Fund will, apart from assets in liquid form, consist solely of participatory interests in the Global Growth Fund under the Ashburton Investments SICAV domiciled in Luxembourg, which in turn invests in a range of asset classes including equities, fixed income securities, money market instruments, cash, deposits, derivatives and warrants

The above meet the criteria for the display of a statement of changes in the composition of the portfolio

The fund adhered to the policy objectives as stated in the Supplemental Deed in terms of it's allowed investments.

Definitions

Total return:	Total return accounts for two categories of return: income and capital appreciation. Income includes interest paid by fixed income investments, distributions or dividends. Capital appreciation represents the change in the market price of an asset.
NAV (net asset value):	This is the total value of assets in the portfolio less any liabilities, divided by the number of shares outstanding.
TER (total expense ratio):	This is a measure of the total costs associated with managing and operating an investment fund. These costs consist primarily of management fees and additional expenses such as trustee and custody fees, auditor fees and other operational expenses. The total cost of the fund is divided by the fund's total assets to arrive at percentage, which represents the TER.
Management fee :	A management fee is a charge levied by an investment manager for overseeing an investment fund.
Performance fee :	A performance fee is a payment made to an investment manager for generating positive returns. This is as opposed to a management fee, which is charged withou regard to returns.
Index:	In the case of financial markets, an index is a theoretical portfolio of assets representing a particular market or a portion of it. Each index has its own calculation methodology and is usually expressed in terms of a change from a base value. Thus, the percentage change is more important than the actual numeric value.
Transaction costs:	Total costs incurred by the investor in buying and selling the underlying assets of a financial product and is expressed as a percentage of the daily NAV calculated on an annualised basis. These costs include brokerage, VAT, and trading costs.
Annualised cost:	Is the cost per year of investing in the assets of a financial product.
Annualised return:	The weighted average compound growth rate over the performance period measured.
Tracking error:	A measure of the amount of risk that is being taken in excess of the benchmark.
Total investment charges (TIC) :	It is the sum of the Total Expense Ratio (TER) and the Transaction Cost (TC)
Highest & Lowest Return:	The highest and lowest rolling twelve-month performance of the portfolio since inception.
Sharpe Ratio:	The ratio of excess return over the risk-free rate divided by the total volatility of the portfolio.
Sortino Ratio:	The ratio of excess return over the risk-free rate divided by the downside deviation of the portfolio.
Standard Deviation:	The deviation of the return of the portfolio relative to its average.
Drawdown:	The greatest peak to trough loss until a new peak is reached.
Information ratio :	The information ratio measures the risk-adjusted performance of a portfolio relative to a benchmark.
