Ashburton Global Balanced Fund (USD) - R Class (Marketing Communication for Retail Investors)

Minimum Disclosure Document as at 30 November 2025

Investor profile

This Fund is designed as a moderate risk strategy for clients who are prepared to accept a moderate degree of risk with their capital.

Investment objectives and strategy

The objective of the Fund is to provide investors with growth in total return (capital plus income) over the medium to long term, through a balanced asset allocation across a diversified range of asset classes, regions and currencies. To include equities, fixed income securities, Money Market Instruments, deposits, derivatives and warrants, without exceeding a maximum equity exposure of 70%.

Performance and statistics

Source: Morningstar®, Ashburton Fund Managers (Ptv) Ltd

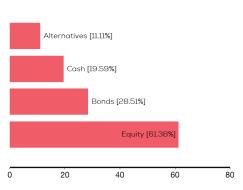

The investment performance is for illustrative purposes only and is calculated on a bid to bid basis and does not take any initial fees into account. Income is reinvested on the ex-dividend date. Actual performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income. Past performance is not necessarily an indication of future performance.

Definitions

Total return accounts for two categories of return: income and capital appreciation. Income includes interest paid by fixed income investments, distributions or dividends. Capital appreciation represents the change in the market price of an asset. Total return:

NAV (net asset value): This is the total value of assets in the portfolio less any liabilities, divided by the number of shares outstanding

This is a measure of the total costs associated with managing and operating an investment fund. These costs consist primarily of management fees and additional expenses such as trustee and custody fees, auditor fees and other operational expenses. The total cost of the fund is divided by the fund's total assets to arrive at a percentage, which represents the TER. TER (total expense ratio):

Management fee A management fee is a charge levied by an investment manager for overseeing an investment fund.

A performance fee is a payment made to an investment manager for generating positive returns. This is as opposed to a management fee, which is charged without Performance fee :

regard to returns

In the case of financial markets, an index is a theoretical portfolio of assets representing a particular market or a portion of it. Each index has its own calculation Index: methodology and is usually expressed in terms of a change from a base value. Thus, the percentage change is more important than the actual numeric value

Total costs incurred by the investor in buying and selling the underlying assets of a financial product and is expressed as a percentage of the daily NAV calculated on an annualised basis. These costs include brokerage, VAT, and trading costs.

Transaction costs: Annualised cost: Is the cost per year of investing in the assets of a financial product

Annualised return: The weighted average compound growth rate over the performance period measured.

A measure of the amount of risk that is being taken in excess of the benchmark Tracking error It is the sum of the Total Expense Ratio (TER) and the Transaction Cost (TC) (TIC) Total investment charges: Highest & Lowest Return: The highest and lowest rolling twelve-month performance of the portfolio since inception

Sharpe Ratio: The ratio of excess return over the risk-free rate divided by the total volatility of the portfolio. Sortino Ratio: The ratio of excess return over the risk-free rate divided by the downside deviation of the portfolio.

The deviation of the return of the portfolio relative to its average Standard Deviation: The greatest peak to trough loss until a new peak is reached. Drawdown:

Information ratio: The information ratio measures the risk-adjusted performance of a portfolio relative to a benchmark
