Ashburton Sterling Asset Management Feeder Fund - R Class

Minimum Disclosure Document as at 30 September 2025

ASHBURTON

INVESTMENTS

Investor profile

This Fund is designed as a moderate risk strategy for clients who are prepared to accept a moderate degree of risk with their capital.

Investment objectives and strategy

To invest in a GBP hedged share class of the Ashburton Investments SICAV - Global Balanced Fund. A dollar based fund, which aims to provide investors with growth in total return (capital plus income) over the medium to long term, through a balanced asset allocation across a diversified range of asset classes, regions and currencies. To include equities, fixed income securities, Money Market Instruments, deposits, derivatives and warrants, without exceeding a maximum equity exposure of 70%.

Performance and statistics

Source: Morningstar®, Ashburton Fund Managers

The investment performance is for illustrative purposes only and is calculated on a bid to bid basis and does not take any initial fees into account. Income is reinvested on the ex-dividend date. Actual performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income.

Definitions

Transaction costs:

Total return:

Total

dividends. Capital appreciation represents the change in the market price of an asset

NAV (net asset value): This is the total value of assets in the portfolio less any liabilities, divided by the number of shares outstanding.

This is a measure of the total costs associated with managing and operating an investment fund. These costs consist primarily of management fees and additional EER (total expense ratio): expenses such as trustee and custody fees, auditor fees and other operational expenses. The total cost of the fund is divided by the fund's total assets to arrive at a

percentage, which represents the TER.

Management fee: A management fee is a charge levied by an investment manager for overseeing an investment fund.

Performance fee : A performance fee is a payment made to an investment manager for generating positive returns. This is as opposed to a management fee, which is charged without regard to returns.

regard to return

Index:

In the case of financial markets, an index is a theoretical portfolio of assets representing a particular market or a portion of it. Each index has its own calculation methodology and is usually expressed in terms of a change from a base value. Thus, the percentage change is more important than the actual numeric value.

Total costs incurred by the investor in buying and selling the underlying assets of a financial product and is expressed as a percentage of the daily NAV calculated

Annualised cost: on an annualised basis. These costs include brokerage, VAT, and trading costs.

Is the cost per year of investing in the assets of a financial product.

Annualised return: The weighted average compound growth rate over the performance period measured.

Tracking error:

A measure of the amount of risk that is being taken in excess of the benchmark.

(TIC) Total investment charges:

It is the sum of the Total Expense Ratio (TER) and the Transaction Cost (TC)

Highest & Lowest Return:

The highest and lowest rolling twelve-month performance of the portfolio since inception.

Sharpe Ratio: The ratio of excess return over the risk-free rate divided by the total volatility of the portfolio.

Sortino Ratio: The ratio of excess return over the risk-free rate divided by the downside deviation of the portfolio.

Standard Deviation: The deviation of the return of the portfolio relative to its average.

Drawdown: The greatest peak to trough loss until a new peak is reached.

Information ratio: The information ratio measures the risk-adjusted performance of a portfolio relative to a benchmark
