ASHBURTON MULTI MANAGER EQUITY FUND

Minimum Disclosure Document as at 30 April 2021

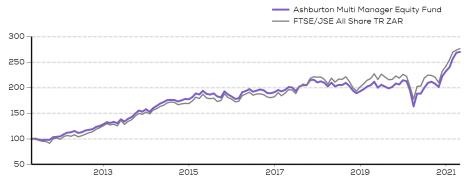

Investor profile

This fund is suited to investors seeking long-term above inflation capital appreciation with no significant income stream with an investment horizon of five years or longer; who can withstand capital volatility, and seeking a fund where the core is managed by a combination of leading South African asset managers on a segregated managed

Investment objectives and strategy

This portfolio invests in assets in liquid form and in shares across all sectors of the JSE Securities Exchange of South Africa and other permissible assets allowed by the Act. The portfolio will invest a minimum of 75% of the market value of the portfolio in equities at all times, with offshore asset exposure being limited to 25%. Equity investments are volatile by nature and are susceptible to changes in general market conditions and volatility, as well as economic, political and company specific risks. This fund is also exposed to foreign investment funds and is thereby susceptible to currency risk and potential macroeconomic and political risks brought about by funds invested across various regions.

Performance and statistics

Source: Morningstar®, Ashburton Investments

All performance numbers are for the B1 share class (capped) and are net of all fees and expenses. The above is purely for illustrative purposes. The above portfolio performance is calculated on a NAV to NAV basis and does not take any initial fees into account. For reinvesting funds, income is reinvested on reinvestment date. Actual investment performance will differ based on the initial fees applicable, the actual investment date, the date of reinvestment of income and dividend withholding tax. Past performance is not necessarily an indication of future performance.

Definitions

Total return accounts for two categories of return: income and capital appreciation. Income includes interest paid by fixed income investments, distributions or Total return: dividends. Capital appreciation represents the change in the market price of an asset

This is the total value of assets in the portfolio less any liabilities, divided by the number of shares outstanding. NAV (net asset value):

This is a measure of the total costs associated with managing and operating an investment fund. These costs consist primarily of management fees and additional TER (total expense ratio): expenses such as trustee and custody fees, auditor fees and other operational expenses. The total cost of the fund is divided by the fund's total assets to arrive at a

percentage, which represents the TER

In the case of financial markets, an index is a theoretical portfolio of assets representing a particular market or a portion of it. Each index has its own calculation Index: methodology and is usually expressed in terms of a change from a base value. Thus, the percentage change is more important than the actual numeric value

Total costs incurred by the investor in buying and selling the underlying assets of a financial product and is expressed as a percentage of the daily NAV calculated on an annualised basis. These costs include brokerage, VAT, and trading costs. Transaction costs:

Annualised cost: Is the cost per year of investing in the assets of a financial product.

Annualised return: This is the average rate earned by the investment over a year in the period measured

Tracking error A measure of the amount of risk that is being taken in excess of the benchmark

Disclaimer

Ashburton Management Company (RF) (Proprietary) Limited (Reg No 1996/002547/07) ("Ashburton") is an approved collective investment schemes manager of the Ashburton Collective Investment Scheme ("Ashburton Cis"). Ashburton is regulated by the Financial Sector Conduct Authority (FSCA) and is a full member of the Association for Savings and Investment SA (ASISA). This document and any other information supplied in connection with the Ashburton CIS is not "advice" as defined and/or contemplated in terms of the Financial Advisory and Intermediary Services Act, 37 of 2002 ("the FAIS Act") and investors are encouraged to obtain their own independent advice prior to buying participatory interests in CIS portfolios issued under the Ashburton CIS. Any investment is speculative and involves significant risks and therefore, prior to investing, investors should fully understand the portfolios and any risks associated with them. Collective investment schemes in securities are generally medium to long term investments. In the event a potential investor requires material risks disclosures for the foreign securities included in a portfolio, the manager will upon request provide such potential investor with a document outlining: potential masterial requires for requires a discontinuous of the long of the lo approximately 15h00 each business day (17h00 at month and quarter end). Instructions to redeem or repurchase must reach Ashburton before 14h00 to ensure same day value. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressures. In such circumstances, a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed. CIS portfolios are traded at ruling prices and can engage in borrowing and scrip lending. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. A CIS portfolio may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Participatory interests are calculated on a net asset value (NAV) basis, which is the total market value of the portfolio including any income accruals and less any permissible deductions from the CIS portfolio divided by the number if participatory interests in issue. All fees quoted are inclusive of VAT. The Total Expense Ratio (TER) is expressed as an annualised percentage of the charges, levies and fees incurred by the portfolio related to its management, for the period under review against the average NAV of the portfolio over this period. A higher TER does not necessarily imply a poor return, nor does a lower TER imply a good return. The current TER cannot be regarded as an indication of future TERs. A full detailed schedule of fees, charges and commissions is available from Ashburton on request and incentives may be paid and if so, would be included in the overall costs. The manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The manager has a right to close the portfolio to new investors in order to manage the portfolio more efficiently in accordance with its mandate. Additional information about this product, including brochures, application forms and annual or quarterly reports, can be obtained from the Manager, free of charge, and from the website: www.ashburtoninvestments.com. Ashburton Fund Managers (Pty) Ltd is an authorised Financial Services Provider.
