Global stocks: when bad is good

Jul 17, 2019, 14:26 PM by User Not Found

Why do risky assets, like stocks, sometimes respond positively to bad economic news? It feels intuitively wrong. After all, any indications that the global economy is slowing suggests that the pace of earnings growth will ultimately start slowing too.

The language of Money

Jul 2, 2019, 15:42 PM by User Not Found

Money is systematic. If you have it, you can use it. The truth is anyone with money in their hands can use it to effect transactions or purchase goods. This means that financial acumen is not a necessity in undertaking the spending of money, which can make money cost too much, for most.

Market overview

Jul 2, 2019, 11:20 AM by User Not Found

Global equity markets rebounded strongly in June, recovering most of the losses endured in May. Although most economic data released in the month continued to point to slightly slower growth, dovish rhetoric from major central banks boosted risky assets. Markets are currently pricing in a fair number of interest rate cuts by the US Fed over the next 12 months.
